PROFESSIONAL SUMMARY

Results driven IBM MQ Middleware Engineer with experience supporting enterprise messaging infrastructure within large-scale financial environments. Specialized in IBM MQ for z/OS administration, MQ security, Queue Sharing Groups (QSG), TLS certificate management, clustering, high-availability architecture, and enterprise middleware support.

Experienced administering a large environment of queue managers across multiple Parallel Sysplex environments and data centers, while supporting mission-critical financial transaction systems. Strong background collaborating with infrastructure, security, CICS, and development teams to deliver secure and reliable enterprise messaging solutions.

Active security clearance with experience supporting secure government messaging systems and regulated enterprise environments.

TECHNICAL SKILLS

- IBM MQ, Middleware Engineering
- Queue Sharing Groups (QSG), High Availability (HA), MQ Clustering
- z/OS, SDSF, TSO/ISPF
- CICS Integration
- JCL, COBOL
- RACF, ACF2, TopSecret
- TLS/SSL, Digital Certificates
- Production Support, Disaster Recovery (DR)
- Incident Management, Root Cause Analysis, Change Management
- Infrastructure Modernization, Operational Automation

PROFESSIONAL EXPERIENCE

Fiserv

Senior MQ Systems Engineering Professional

Marietta, GA (Remote) | March 2021 – Present

- Administer enterprise IBM MQ infrastructure consisting of 175+ queue managers across multiple z/OS Parallel Sysplex environments.
- Manage MQ security using RACF, ACF2, and TopSecret security products.
- Lead TLS certificate lifecycle management initiatives supporting secure enterprise MQ communications.
- Design, build, maintain, and troubleshoot MQ clusters and Queue Sharing Groups supporting high-availability financial systems.
- Partner with infrastructure, application development, CICS, and security teams to implement enterprise messaging solutions.
- Support enterprise integration and modernization initiatives involving acquired business infrastructures.
- Perform production troubleshooting and root cause analysis for enterprise middleware environments.
- Coordinate directly with IBM support to resolve complex infrastructure issues.
- Contribute to operational automation and infrastructure efficiency improvements.

UST

MQ System Administrator – Fiserv Environment

Marietta, GA (Remote) | March 2020 – March 2021

- This was a contract position for my current role.
- Supported administration of large-scale IBM MQ for z/OS enterprise messaging environments.
- Managed MQ change management activities and CAB approval processes.
- Built and configured new queue managers supporting infrastructure expansion.

- Decommissioned obsolete MQ objects to improve operational efficiency.
- Participated in disaster recovery testing, IPL activities, and maintenance events.
- Automated routine administrative tasks to reduce manual effort.

Mainframe Developer Trainee – Step IT Up America Program

October 2019 – March 2020

- Completed intensive enterprise mainframe training focused on z/OS operations, JCL, and COBOL.
 - Developed troubleshooting skills supporting enterprise batch and application environments.
 - Received the Shooting Star Award for outstanding technical performance.
-

Total Quality Logistics

National Sales Recruiter

Atlanta, GA | January 2018 – August 2019

- Managed full-cycle recruiting operations within a high-volume corporate environment.
 - Conducted sourcing, interviewing, and candidate development activities nationwide.
 - Consistently exceeded recruiting and retention performance metrics.
 - Led diversity recruiting initiatives and facilitated recruiting strategy meetings.
-

United States Marine Corps

January 2009 – January 2018

Canvassing Recruiter

Kennesaw, GA | February 2015 – January 2018

- Recruited, mentored, and prepared applicants through structured leadership programs.
- Managed outreach initiatives, recruiting operations, and applicant processing activities.
- Maintained exceptionally low attrition rates while preparing over 138 applicants.

Section Leader

Camp Lejeune, NC | May 2013 – February 2015

- Led operations and personnel management in adverse and chaotic conditions ensuring mission accomplishment.
- Developed training programs supporting operational readiness across a 900-person department.
- Coordinated logistics and operational planning for worldwide operations.
- Maintained accountability for communications equipment valued at over \$5 million.
- Reduced preventable operational errors through process improvement initiatives.

Field Radio Operator

Camp Lejeune, NC / Cherry Point, NC | October 2009 – May 2013

- Deployed and maintained secure communications systems in austere environments to support anti-terrorism and drug interdiction operations.
- Managed cryptographic materials and communications equipment valued at over \$8.3 million.
- Supported operations related to Operation Enduring Freedom.

EDUCATION & PROFESSIONAL TRAINING

- WebSphere MQ Bootcamp for System Administrators
- Advanced Leadership Course
- Basic Leadership Course
- Mentor and Leadership Course
- Public Speaking Training
- Communication and Consultative Selling Skills
- Counseling Apprenticeship – DOL Apprenticeship Certification
- Seymour High School Diploma

PROFESSIONAL AWARDS

- Navy and Marine Corps Achievement Medal
- Army Achievement Medal
- UST Shooting Star Award
- Lt. Col. Kevin Shea Recognition Award
